Lockable storage modules

ABOUT SEDUS

Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

Why grand slam locker unit?

Consistent design

for the entire grand slam cabinet range

Back panels with added value

due to writable whiteboard surfaces or acoustic fabrics

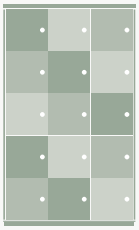

A wide range of locking systems

offer the right solution for every need

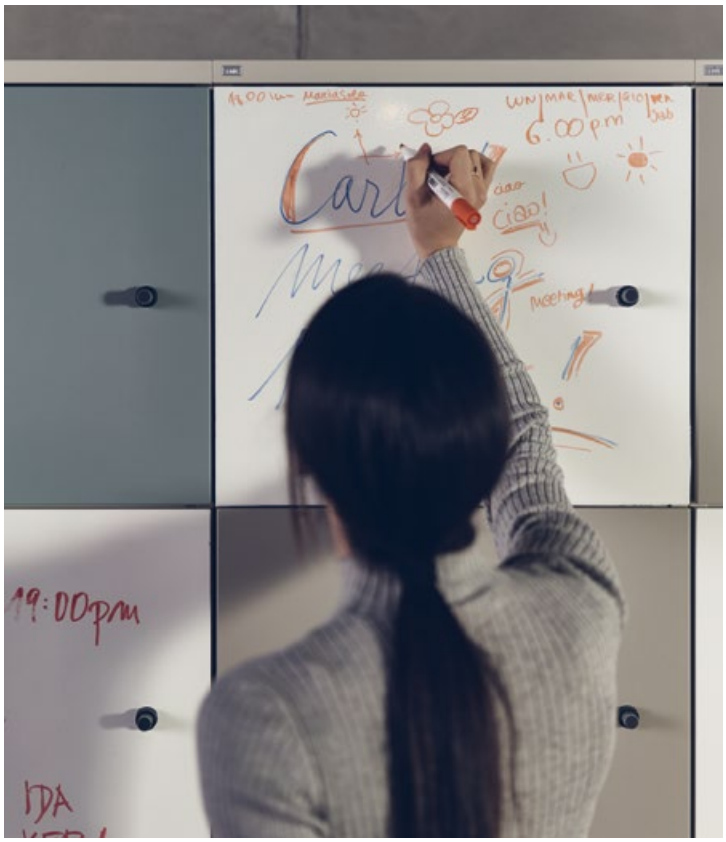

A wide range of design possibilities

each front panel can have a different finish

The demand for creatively used spaces is increasing, which is why many front and back panels are optionally available as writable whiteboard surfaces.

Practical and personal

When the structure and purpose of the office change, the furnishings must also adapt. More and more employees regularly work from home and come to the office for meetings and exchange. There, they use flexible or multi-user workstations that they share with their colleagues. The grand slam locker cabinet complements these areas perfectly. It provides storage space for personal items close to the working area. With just a few touches, everything is ready to start a productive day.

Application areas:

- in the reception area
- in front of meeting rooms
- personal storage space close to the workstation

The combination of wardrobe elements or shelves and the design options of the front panels turn the locker into an eye-catcher with added value.

In addition to the usual office essentials, it is also possible to store larger items, such as suitcases up to a maximum size of 56 x 45 x 25 cm.

Matching planters from the grand slam product family can be integrated beautifully into the locker combination. In addition to improving air quality, plants can strengthen the feel-good atmosphere and provide a visual highlight in the room.

Plinth

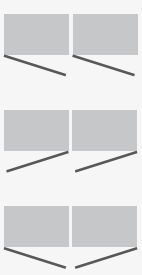

Glides

Door hinges

One-door cabinets

Double-door cabinets

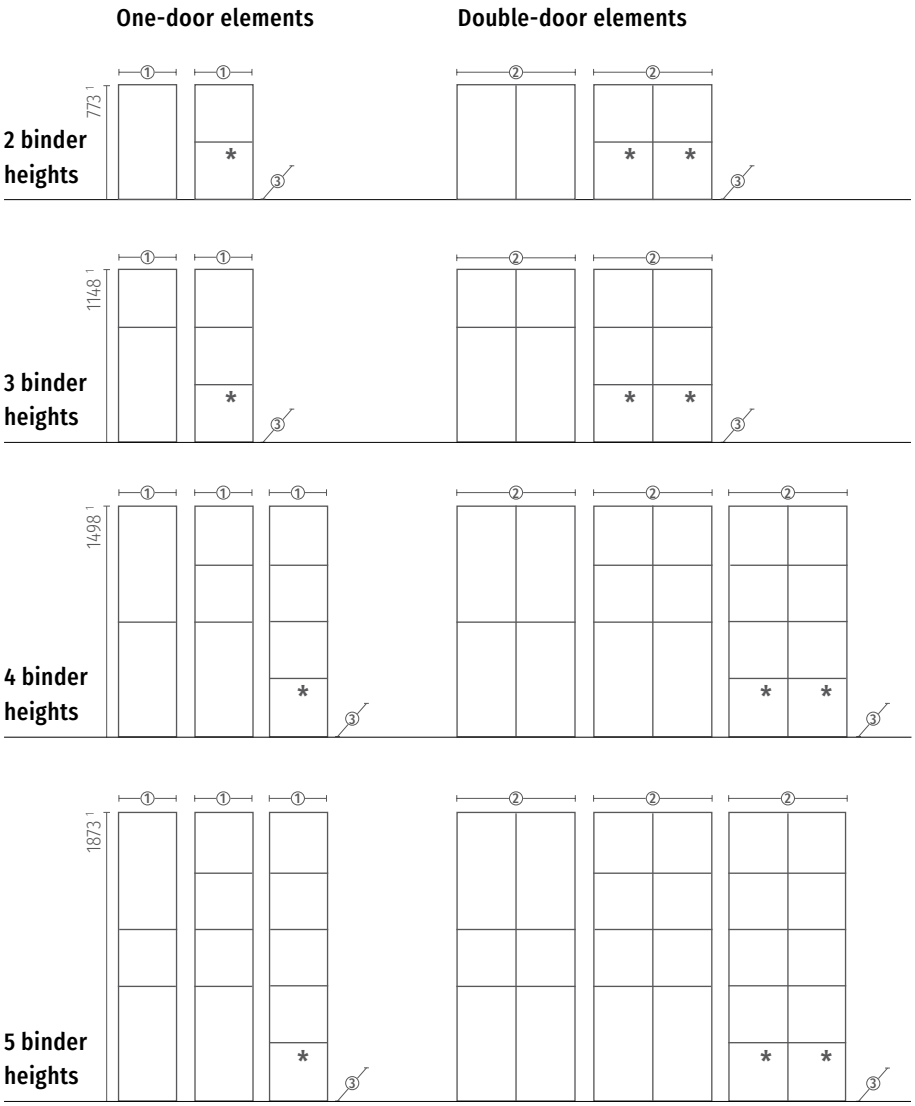

For easy access, door hinges
are available on both the left or right

CONFIGURATION AND INSTALLATION

Many modules, many possibilities

The modular lockers are available in four heights and three depths with two different door sizes. The one-door or double-door standard modules can be linked together in any order and offer a wide range of combination options. There are two options for the floor finish: Adjustable glides, which compensate for unevenness, and plinths, which form a flush finish.

Depending on the required use, the lockers are available in three depths

① 400 / 500 / 600
② 800 / 1000 / 1200
③ 436 / 500 / 636

*these compartments are optionally available without a door

[1] with plinth and 25-mm thick top and bottom shelves (units with glides are 36 mm lower)

Everything stored safely

There are two systems for the lockers: multi-user and private mode. The multi-user mode is suitable for when compartments are only used temporarily, for example, in reception areas or sports facilities. The private mode, on the other hand, is set up for a single user. The locker cabinets are battery-operated and, therefore, independent of the building infrastructure power supply. This also makes moving or rearranging the cabinets an easy task.

Lock with changeable cylinder and folding key

RFID combination lock

Free-code or fix-code analogue combination lock

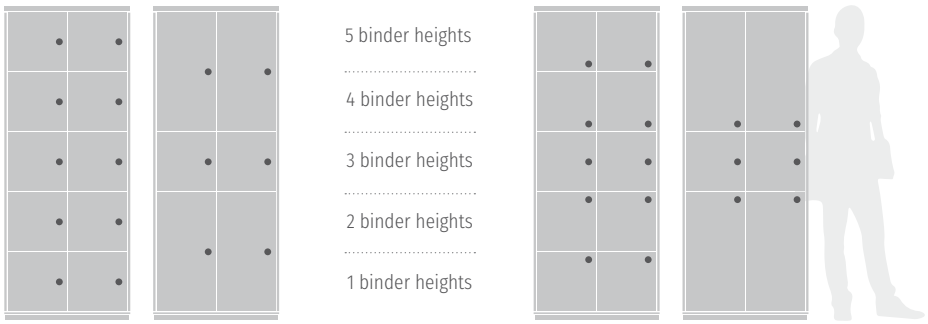

RFID lock with key

Systems in comparison	Lock with changeable cylinder and folding key	Analogue combination lock	RFID combination lock	RFID lock with key card
Open/close with	Key (folding)	Input of 4-digit numerical code	Input of 4- to 8-digit numerical code or with assigned RFID card	Assigned RFID card
Properties	• Mechanical locking system • Key can be folded down • Changeable cylinder for exchanging locks	• Analogue combination lock • Easy lock management (no keys, no battery)	• Electronic combination lock • Touch screen display • Intuitive control panel with large numbers	• Electronic RFID lock • Keyless, reduced design (only a small RFID PIN visible)
Costs	⊕	⊕⊕	⊕⊕⊕	⊕⊕⊕⊕

Reading type	–	–	Mifare Classic, Mifare Desfire Evo II	Mifare Classic, Ultralight, DESFire EV1 / EV2, NFC (HCE), ISO 15693, HID iCLASS, LEGIC

Options for lock positions

For better accessibility of the locker, there is an option to place the lock position at different heights, depending on the height of the user. As standard, the locks are always positioned in the centre of the door.

Standard

The locks are positioned centrally on all doors

Optimised

- Locks at 1–2 binder heights = lock offset upwards
- Locks at 3 binder height = central
- Locks at 4–5 binder heights = lock offset downwards

VARIATION AND DIVERSITY

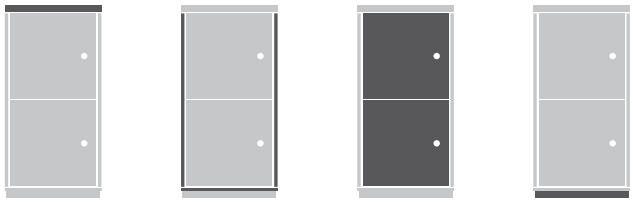

Design that fits in perfectly

Whether as a classic storage space, integrated as a room divider or as a creative work tool – the grand slam locker cabinets can be configured according to individual requirements and situations.

Customised surface design

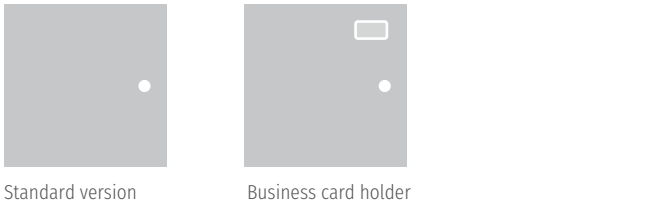

The top, carcass, front and plinth can be designed separately with approx. 40 colours and materials from the Sedus portfolio. This creates a large number of individual combination possibilities.

Top shelf | Carcass | Front | Plinth

Letter slot and business card holder

Optionally, it is also possible to configure various designs of letter slots and business card holders (suitable for standard format of 85 x 55 mm).

Standard version | Business card holder

- Letter slot (metal frame)
- Business card holder (separate)

- Letter slot (metal frame)
- Business card holder (integrated)[2]

- Letter slot (concave groove)
- Business card holder (separate)

[1] If a locker with an integrated letterbox slot is selected, the locker is delivered including a shelf, so that documents that are posted in land safely in a separate compartment.

[2] Only possible for door widths of 500 mm

Numbering

The fronts are numbered with white or black foil stickers. Two sizes and positions are available. The numbering always starts at the top left and proceeds downwards in columns to the bottom right.

Large numbers
at the bottom right

Small numbers
next to the lock

Each front can be designed uniquely. Whether it comes to different colours, whiteboard surfaces or the design of patterns – there are no limits to creativity.
