

se:hive bench

Used as a retreat, the se:hive product family creates flexibly adaptable room structures that fit into existing facilities as well as new space concepts.

se:hive bench includes a fully upholstered bench with a design that blends in seamlessly to create a room solution instead of a single piece of furniture. Thanks to its work-focused orientation and seat height, which is adapted to standard table dimensions, se:hive bench combines functionality with comfort and creates an inviting atmosphere.

Advantages

- se:hive bench visually divides open space or large areas, creates zones and contributes to a pleasant office atmosphere.
- Different sizes and shapes cater for diverse use.
- The fabric-covered elements effectively reduce noise and create quieter retreats within the often noisy open space.
- The retreat offers solutions for various application scenarios such as a focused workstation, informal meetings or relaxed conversations.
- The soft seating elements and other work solutions expand the application potential from individual product to whole-space solution – from private retreats to open communication areas.
- The temporary retreat in modular design provides both visual and acoustic screening.

Features

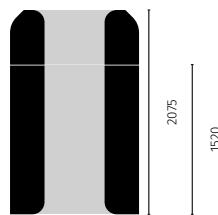

- se:hive bench consists of enclosures with integrated sofa elements.
- Fixed configurations with backrest and, where practical, armrests are available for the retreat.
- The seat height of the bench is 450 mm (table height).
- Connecting brackets provide stability and are hooked into the bottom of the se:hive module as well as fixed to the bench. The brackets (and therefore also the bench) can be removed retrospectively without leaving visible screw holes.
- The recommended user weight per seat is up to 110 kg.
- The bench is fitted with non-slip stop glides.

Options/accessories

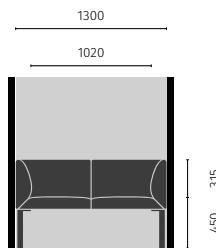

- A 2- or 3-seater bench is integrated into the 90° / 120° module.
- The retreat is available with and without an add-on.
- This bent sheet metal monitor mount comes in two versions:
 - 1) For se:hive bench without attachment/add-on: the mount is simply hooked over the wall module
 - 2) For se:hive bench with attachment/add-on: the mount is inserted into the groove at the top of the wall module. The attachment is mounted above it in the usual way.
- The elements can also be planned with supplementary angled elements.
- Choose from the Sedus fabric collections for bench upholstery.
- Screen fabrics can be selected from the Sedus portfolio. There is also an option to choose different fabrics for the interior and exterior.
